mCollection®

mPOP®

Star Micronics' mPOP® (mobile point of purchase) remains the industry's first hybrid POS solution that combines a cash drawer and printer peripheral into one simplified and stylish system.

With the POP10Ci model, Star proudly offers a convenient and more powerful direct iOS connectivity option while still supporting use with Windows and Android devices. This modern, compact peripheral is ideal for tablet and mobile device based POS (mPOS) systems.

Connect your preferred tablet or mobile device, and the mPOP® transforms into a fully integrated POS system. Compatible with all major operating systems (iOS, Android, Windows, macOS), the mPOP® works with any supported POS or mPOS software, allowing retailers the freedom of using various platforms.

With Apple MFi certification, the POP10Ci model offers a direct connection with the iPad®, iPhone®, and iPod Touch®, enabling the POP10Ci to charge your iOS device while data is transferring. With this convenient method, the same USB-C charging cord that comes with the iOS device can be used.
Enhancing functionality, the POP10Ci includes USB-A and USB-B ports for connecting external devices and peripherals, such as the optional 2D barcode scanner.

The mPOP® combines a two-inch thermal receipt printer with "drop-in and print" paper loading and a unique and functional Flat Bill till. The till, featuring a 4-bill and 4- or 6-coin slot design, provides easy currency storage and management with the same small mPOP® footprint.

With multiple exit options for enhanced cable management, the mPOP® complements any countertop or on-the-go area for a visually appealing POS system no matter where you do business.

- **Part of the mCollection** : Features the mCollection's Sleek, Ultra-Compact Design with Advanced Cable Routing; Easily Pairs with mCollection Accessories
